Transition to the Profession: What’s Next?

Julie Ju-Youn Kim RA AIA, Associate Professor
Director of Undergraduate Program + Associate Chair, School of Architecture
Fridays  11:15am – 12:05pm

If you’ve asked any of these questions, then you should take this class!

“Transition to the Profession: What’s Next?” is an incubator workshop for students interested in learning and talking about life after Tech. Students will engage in active discussions with young to mid-level professionals and faculty with a focus on preparation for navigating the profession. This is a one-hour credit course where we will discuss the following topics:

- Leadership and Organizational Skills
- Communication Skills
- Leveraging Your Degree
- Building your Network
- Professional Culture
- Community Outreach
- Negotiations

The semester will be comprised of weekly discussions and presentations. In addition to faculty-led discussions, we will invite professionals (many of them Georgia Tech alumni) to present and share their experiences with us.

Learning Objectives

- Encourage student exchange of ideas in communication with professionals and faculty
- Expand the knowledge base for the students in preparation for the profession or for graduate school

- Should I go to graduate school? How do I pick one?
- I think I want to work for a while, but how do I pick the right firm?
- What can I do with my undergraduate degree? Will I be taken seriously?
- How do I build my professional network?
