Architecture, as a discipline, embodies various fields of knowledge. Architectural research derives from within its own discipline and diverges into an interdisciplinary domain. Divergence in Architectural Research implies that there is an agency to expand the disciplinary boundary of architecture and produce new fields of knowledge emerging from within the architectural domain.

Lecture Series

REDESIGNING CITIES

REDESIGNING CITIES: The Speedwell Foundation Talks @ Georgia Institute of Technology is a series of presentations + conversations between leading urbanists that address 21st Century urban challenges: social capital, equity, climate change, outdated infrastructure, disruptive technologies, and money. The series is hosted by Ellen Dunham-Jones, professor and director of the Master of Science in Urban Design degree in the Georgia Tech School of Architecture.

JAN 22 - APR 08
